

Abdullah

AI Engineer

Islamabad, Pakistan | 0332-5785998 | abdullahizaq321@gmail.com | github.com/Abdullah-qazi-1 | linkedin.com/in/abdullahdatascientist

Professional Summary

Machine Learning and AI Engineer with hands-on experience designing, training, and deploying end-to-end ML and Generative AI systems, including leakage-proof forecasting pipelines, RAG-based AI agents, and production MLOps workflows with automated CI/CD deployment on AWS. Ranked 8th worldwide (out of international teams) in the SmartReco Build Challenge 2026 AI hackathon. Strong foundation in machine learning algorithms, model evaluation, and large language model (LLM) application development. Seeking an AI Engineer role to build reliable, production-grade AI systems.

Technical Skills

Programming & Data: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Power BI

Machine Learning: Scikit-learn, XGBoost, LightGBM, Random Forest, Regression, Classification, Hyperparameter Tuning, Feature Engineering, Statistical Analysis, Model Evaluation & Validation

Generative AI & LLMs: OpenAI API, Groq API, Gemini API, LangGraph, AI Agents, Retrieval-Augmented Generation (RAG), ChromaDB, Vector Embeddings, Prompt Engineering

Backend & Databases: FastAPI, Git, Jupyter Notebook, SQLite, MongoDB Atlas

MLOps & Cloud: Docker, GitHub Actions (CI/CD), AWS (S3, ECR, EC2), MLflow, DagsHub

Projects

Qazterion (CLI Coding Agent) | *Python, LiteLLM, SQLite*

- Developed a terminal-based autonomous coding agent capable of planning, writing, testing, and repairing its own code without manual supervision.
- Implemented a checkpointed-edit system so every code change can be safely rolled back, reducing unrecoverable failed-edit incidents to 0%.
- Designed a persistent SQLite state layer to track task history across sessions, cutting repeated re-planning overhead and improving task-completion consistency by an estimated 30%.

SmartReco (Behavioral Recommendation Agent) | *LangGraph, ChromaDB, FastAPI*

- Built an e-learning recommendation agent that suggests content based on real learner behavior rather than clicks alone.
- Engineered a scoring model using dwell time, scroll depth, and click behavior, improving recommendation relevance by approximately 25% over a click-only baseline.
- Ranked **8th place worldwide** among international teams in the SmartReco Build Challenge 2026 (Krish Naik Academy Global Hackathon).

Eurus (AI Employee Copilot) | *Next.js, FastAPI, Docker*

- Built an enterprise AI copilot that ingests company data to help employees draft proposals, emails, and meeting summaries.
- Implemented RAG-grounded, verifiable citations so every generated response is traceable to its source document, cutting manual drafting time by an estimated 40%.
- Containerized the service with Docker, enabling consistent one-command deployment across development, staging, and production environments.

Pakistan Food Price Intelligence | *XGBoost, LightGBM, FastAPI*

- Built a forecasting pipeline predicting prices for 5 food commodities using macroeconomic and weather data.
- Engineered and benchmarked 6 regression model variants (XGBoost, LightGBM) per commodity, selecting the top performer based on cross-validated error.
- Identified and fixed a data leakage bug, improving the model's test R^2 score to **0.9739**, a significant accuracy gain over the pre-fix baseline.

Phishing Website Detection (End-to-End MLOps) | *MongoDB Atlas, MLflow, AWS*

- Built a production machine learning pipeline that classifies websites as phishing or legitimate in real time.
- Tracked 14 model experiments using MLflow across multiple iterations, selecting the deployed version based on a 35% reduction in false-positive rate versus the baseline model.
- Automated deployment to AWS on every code push using GitHub Actions CI/CD, reducing manual deployment time from hours to minutes.

Education

Air University, Islamabad

Bachelor of Science in Data Science

- Relevant Coursework: Statistics, Machine Learning, Applied Data Engineering

Islamabad, Pakistan

Present

Certifications & Achievements

8th Place Worldwide in the SmartReco Build Challenge 2026, Krish Naik Academy Global Hackathon

Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp

Complete Python with Data Structures & Algorithms Bootcamp (LeetCode Exercises)
